Appendix 1

Proposition: The Board's role descriptions.

Rapporteur: Alexander Riese

Background: There has been a widely accepted rule that all board roles come with a language requirement, but this rule cannot be found anywhere in our steering documents and is therefore difficult to enforce. The therefore proposes to introduce this rule to the Board's role descriptions

Adopting this proposition would mean that all board roles have a formal requirement of fluency in both Swedish and English, with the exception of the association's and board's second vice president and head of internal communication, the board member – head of marketing and the board member – head of international affairs. These rolls would only require fluency in English, but the board member – head of marketing coming with a strong recommendation to also be fluent in Swedish.

Claim

that the Association meeting approves the updated role descriptions for the board as outlined in appendix 2.
